EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leonard Holtz on July 7, 2004.

The application has been amended as follows:

In claim 13, the term "of claim 1" is replaced with --of claim 12--.

This amendment is necessary to ensure clarity of the claims.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 includes the limitations that a stimuable phosphor cassette comprises a front cover, a back base attracted to a back plane, where the front cover and the back base are separably assembled.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Verbeke, U. S. Patent No. 5,751,001, describes a stimuable phosphor cassette comprising a front cover and a back base, where the front cover and back base are separably attached (col. 3, lines 16-19).
